

Be cognizant of who can access your data.

Enhance your cyber defense posture with access governance and lifecycle management.

Streamline Access Lifecycle Management

Providing a seamless user experience while maintaining strong cyber defense capabilities is a challenging task for any organization in a dynamic technology ecosystem. With manageID control the entire lifecycle for an identity (and corresponding access) as it progresses, from establishing the identity, provisioning downstream applications, and termination/archival of the identity record. During this process, manageID solution orchestrates the relationships between identities, and all of the linked, underlying credentials and access.
